

Preface: Ethics and the politics of food 19  
*Matthias Kaiser and Marianne Elisabeth Lien*

### **Keynote papers**

Political consumerism: Why the market is an arena for politics 23  
*Michele Micheletti*  
Whales as persons 28  
*Paola Cavalieri*  
Can food safety policy-making be both scientifically and democratically legitimated? If so, how? 36  
*Erik Millstone*

### **Part 1 – Politics and ethics of transparency**

Consumer concerns and ethical traceability: outline of a liberal argument 51  
*Volkert Beekman*  
Ethical traceability 56  
*Christian Coff*  
Towards value based autonomy in livestock farming? 61  
*Karel de Greef, Carolien de Lauwere, Frans Stafleu, Franck Meijboom, Sabine de Rooij, Frans Brom and Jan Douwe van der Ploeg*  
Participatory methods and food policy: Different approaches for different purposes 66  
*Jon Fixdal*  
Farmers markets as a new arena for communication on food 72  
*Anne Moxnes Jervell, Hanne Torjusen and Eivind Jacobsen*  
Consumer information about farm animal welfare: A study of national differences 77  
*Unni Kjærnes and Randi Lavik*  
The presence of animal welfare-friendly bodies: An organised or disorganised achievement in the food supply chain 80  
*Emma Roe and Marc Higgin*  
Private regulatory approaches and the challenge of pesticide use 85  
*Nicolien van der Grijp*  
Organic values and animal production 90  
*Henk Verhoog and Jan de Wit*

### **Part 2 – Foundational issues in philosophy and ethics**

Biotechnology, disagreement and the limitations of public debate 97  
*Bernice Bovenkerk*  
Cynicism and corporate integrity: Obstacles and possibilities for moral communication 103  
*Erik de Bakker*  
Protecting future generations through submajority rule 109  
*Kristian Skagen Ekeli*  
Scientific advice and the ideal of certainty 114  
*Anna Paldam Folker and Peter Sandøe*  
Controlling biodiversity? Ethical analysis of the case of swine fever and wild boar in Denmark 119  
*Christian Gamborg and Peter Sandøe*  
The moral basis of vegetarianism 123  
*Espen Gamlund*  
Problems of principlism 128  
*Laurens Landeweerd*  
Passive nature and safe food? 133  
*Svein Anders Noer Lie*  
The human and social sciences in interdisciplinary biotechnology research: Trojan horses or useful idiots? 138  
*Bjørn Myskja and Reidun Heggem*  
Moral co-responsibility in food production and consumption 143  
*Hilde W. Nagell*  
Genetically modified foods between ethics and public policy 149  
*Assya Pascalev*

### **Part 3 – Trust in food**

Food safety in Europe: New policy and shifting responsibilities 157  
*Lotte Holm and Bente Halkier*  
Politicising consumer trust in food: A socio-institutional explanation to variations in trust 162  
*Unni Kjærnes, Alan Warde and Mark Harvey*  
Why increasing predictability cannot do the job alone when we aim to establish trust in the agri-food sector 167

*Franck L.B. Meijboom*

#### **Part 4 – Ethics and safety in food discourse**

GMO controversy in Japan over test growing of PEPC transgenic rice plants 175

*Mamoru Fukamizu, Seiko Yoshida, Kohji Ishihara*

Uncertainty and precaution; challenges and implications for science and policy of DNA vaccines in aquaculture 180

*Frøydis Gillund and Anne Ingeborg Myhr*

Heuristics of precaution: Towards a substantial consideration of ethics in the regulation of agri-food biotechnology risks 185

*Andoni Ibarra and Hannot Rodríguez*

Negotiating signs of pleasure and pain: towards a democratic-deliberative model of animal welfare monitoring 190

*Mara Miele and Adrian Bruce Evans*

A critical appraisal of the UNESCO version of the Precautionary Principle 197

*Bjørn Myskja and Anne Ingeborg Myhr*

Biosecurity research and agroterrorism: Are there ethical issues at stake? 203

*Matias Pasquali*

#### **Part 5 – Sustainability in food production**

No-one at the helm: World trade, sustainability and farm animal welfare 211

*Michael C. Appleby*

Integrative sustainability concept: Operationalisation for the food and agriculture sector 214

*Rolf Meyer*

Ethical and organic? Exploring the contradictions from a local community of small family farmers of southern Brazil 220

*Raquel Moreno-Peñaranda*

The new scientific totalitarianism: An overview on the discourse over genetically modified crops 225

*Asterios Tsioumanis and G. Perentzis*

#### **Part 6 – The tool-box for assessing ethical issues**

Development of an Animal Disease Intervention Matrix (ADIM) 233

*Stefan Aerts, Johan Evers and Dirk Lips*

The process of developing and implementing criteria for sustainable agriculture:

A cross-case analysis 239

*Menno Binnekamp, Paul Ingenbleek and Silvia Goddijn*

‘Animal Ethics Dilemma’: A computer supported learning tool 245

*Trine Dich, Tina Hansen, Anne Algers, Alison Hanlon, Hillar Loor and Peter Sandøe*

Giving ethical advice in a pluralist context: What is the problem? 250

*Ellen-Marie Forsberg*

Values behind biodiversity: A study of environmental controversies related to salmon farming 255

*Arne Sveinson Haugen*

#### **Part 7 – Cultural values in food production and consumption**

Factors influencing halal meat consumption: An application of the theory of planned behaviour 263

*Karijn Bonne, Iris Vermeir, Florence Bergeaud-Blackler and Wim Verbeke*

Ethics and transformation of Polish food chain 270

*Marek Gaworski*

Innocent food and dirty money: The moral economy of food production 274

*Stig S. Gezelius*

The cultural taste of *Gamalost fra Vik*: Reflections about the meanings of a local cheese 280

*Atle Wehn Hegnes, Virginie Amilien and Hanne Torjusen*

Slow food lessons for a fast food nation 285

*Christopher D. Merrett, William Maakestad, Heather McIlvaine-Newsad, and Patrick*

*McLaughlin*

Olive oil and the cultural politics of ‘Denominaciones de Origen’ in Andalusia 292

*Nefissa Naguib*

Lookin’ for some down-home cookin’? A case study of household pork production in the Czech Republic 297

*Zbynek Ulcak*

How animal friendly should our agricultural practice become? A moral anti-realist argumentation for veganism 301

*Tatjana Visak*

## **Part 8 – Emerging technologies in food production**

Genetics and tailor-made diets: Some ethical issues 309

*Angus Dawson*

Nanofood: Lessons to be learnt from the debate on GM crops? 314

*Mette Ebbesen*

Farm animal cloning: The role of the concept of animal integrity in debating and regulating the technology 320

*Mickey Gjerris and Peter Sandøe*

The transatlantic conflict over GM food: Cultural background 325

*Tatiana Kochetkova*

Nutrigenomics: A bridge too far, for now? 330

*Albert E.J. McGill*

The transatlantic rift in genetically modified food policy 334

*Celina Ramjoué*

The ethical landscape of non surgical embryo-transfer in pigs: An explorative study of public concerns 339

*Frans Stafleu Dorothé Ducro-Steeverink and Jan Merks*

Agricultural animals as targets of genetic progress: Engaging with animal scientists about the impact of genomics 345

*Richard Twine*

## **Part 9 – Nutrition, equality and global food security**

Free vs. paid school fruit: Big difference with respect to social inequality 353

*Elling Bere and Knut-Inge Klepp*

Who's responsible for school meals? 358

*Astrid Dahl*

Technological interventions for global food security 363

*Albert E.J. McGill*

Urban challenges and solutions for ethical eating 368

*Albert E.J. McGill*

Governance of healthy eating: The changing role of governments in promoting healthy dietary habits and its implications for consumers and civil society 376

*Bent Egberg Mikkelsen*

Food system policies in rich countries and consequences in poor ones: Ethical considerations 382

*Per Pinstrup-Andersen*

Advertising, social responsibility and moral myopia: An overview on the fast food industry 386

*Athanasios Vlachos and Asterios Tsioumanis*

## **Part 10 – Who is responsible? Corporate responsibility and political governance**

Re-doing responsibilities: Re-doing the state politics of food and the political market-place 393

*Kristin Asdal*

The responsibility of food corporations for their customers' health 398

*Tal Caspi and Yotam Lurie*

Governing sustainable food and farming production futures using integrated risk assessment approaches 402

*A.H. Gesche and A. Haslberger*

Ethical principles and practice in organic processing: Governance and corporate responsibility 408

*Mette Weinreich Hansen, Thorkild Nielsen and Niels Heine Kristensen*

Corporate responsibility 413

*Karsten Klint Jensen*

For public prevention or on private plates? The ethical evaluation of personal diets and the shift towards market applications 418

*Franck L.B. Meijboom, Marcel F. Verweij and Frans W.A. Brom*

Can the freedom to choose between gm-free and gm-products be guaranteed by voluntary GM-free regional co-operations in the long-run? 423

*Frauke Pirscher*

## **Part 11 – Critical issues in aquatic production systems**

Turning cheap fish into expensive fish? The ethical examination of an argument about feed conversion rates 431

*Matthias Kaiser*

A warm heart for a cold fish: Moral obligations and welfare considerations in fish farming 437

*Vonne Lund and Cecilie M. Mejdell*

The implications of the use of GM in aquaculture: Issues for international development and trade 442

*Kate Millar and Sandy Tomkins*

Economic values of fish welfare and application of market experiments 446

*Ingrid Olesen, Frode Alfnes, Mia Bencze Rørå, Ståle Navrud, Kari Kolstad*

A story of two fishes 452

*Guro Ådnegard Skarstad*

The ethical slaughter of farmed fish 457

*Ambrose Tinarwo*

Consumer perception about ethical and sustainability issues of fish 464

*Filiep Vanhonacker, Wim Verbeke and Isabelle Sioen*

## **Part 12 – Politics of consumption**

The political-commercial framing of ethical consumption 473

*Eivind Jacobsen and Arne Dulsrud*

Safer than ever? Trust and gender in relation to meat provisioning in Norway 478

*Marianne Elisabeth Lien and Randi Lavik*

The Citizen goes shopping: What do the peers have to say about it? 483

*Tassos Michalopoulos*

Mobilising for the animal cause as consumers: An analysis of strategies and practices in Netherlands and Norway 488

*Laura Terragni, Liesbeth Schipper, Hanne Torjusen, Volkert Beekman and Unni Kjærnes*

## **Part 13 – Animal welfare and food production**

Animal welfare differences between Caesarean section and natural delivery in Belgian

Blue cattle 495

*Stefan Aerts, Iris Kolkman, Hilde Vervaecke, Jo Vicca and Dirk Lips*

Stakeholder's attitudes to and engagement for animal welfare: to participation and cocreation 500

*Stefan Aerts and Dirk Lips*

Ethics, bioethics and animal welfare: At what cost 506

*Salvatore Barbera*

Importance of emotional experiences for societal perception of farm animal welfare: A quantitative study in the Netherlands 512

*Birgit K. Boogaard, Simon J. Oosting and Bettina B. Bock*

Animal welfare in animal husbandry: How to put moral responsibility for livestock into practice 518

*Herwig Grimm*

Competing conceptions of animal welfare and their ethical implications for the treatment of non-human animals 523

*Richard P. Haynes*

Animals and the harm of death 528

*Frederike Kaldewaij*

Tail docking in horses: Tradition, economy, welfare and the future of the Belgian draft horse 533

*Dirk Lips and Stefan Aerts*

All animals are equal but some animals are more equal than others: A cross-cultural comparison of human-animal relationships in Netherlands and Norway 535

*Liesbeth Schipper, Hanne Torjusen, Volkert Beekman, Laura Terragni, Michiel Korthals*

Vethics: Vets for ethics in food 540

*Erik Schmid*

Robustness of laying hens: An ethical approach 545

*Laura Star, Esther Ellen, Koen Uitdehaag and Frans Brom*

Attitudes of organic pig farmers towards animal welfare 550

*Marjolein van Huik and Bettina Bock*

Defining the concept of animal welfare: integrating the opinion of citizens and other stakeholders 555

*Els Van Poucke, Filiep Vanhonacker, Griet Nijs, Johan Braeckman, Wim Verbeke and Frank Tuytens*

## **Part 14 – Other contributions**

Comparative analysis of ethical assessment of agricultural biotechnology: Committees functioning and philosophical presuppositions 563

*Catherine Baudoin*

Pigs breeding outdoors and weighing stress: an automatic station for feed distribution and weight taking 565

*Paolo Cornale and Salvatore Barbera*

Dairy cows systems and natural resources utilization for a sustainable and ethical production in NW Italy 567

*Marcella Gentile, Salvatore Barbera and Luca Battaglini*

Pesticide residues in drinking water versus other beverages: a case of an unjustified discrepancy? 569

*Khara Grieger and Stefan Trapp*

Presentation of the computer programme 'Animal Ethics Dilemma' 572

*Tina Hansen, Trine Dich, Anne Algers, Alison Hanlon, Hillar Loor and Peter Sandøe*

A project looking for novel perspectives in agricultural science communication 575

*Matias Pasquali*

The ethical Delphi. A new tool for ethical assessments 577

*Erik Thorstensen and Matthias Kaiser*

Defining animal welfare from a citizen and consumer perspective: Exploratory findings from Belgium 580

*Filiep Vanhonacker, Els Van Poucke, Griet Nijs, Johan Braeckman, Frank Tuytens and Wim Verbeke*

Ethical questions, technological solutions? 583

*Ineke Widdershoven-Heerding*
